EARLY HEARING DETECTION AND INTERVENTION (EHDI) TELEHEALTH APPOINTMENTS FOR COUNSELING FAMILIES

FROM THE PURDUE UNIVERSITY MD STEER AUDIOLOGY CLINIC

THE GOAL
To reach families whose infants did not pass their newborn hearing screening, are having delays in their follow-up, and have concerns during the waiting process.

HOW
To participate, you will need a computer, laptop, or tablet with a webcam and an internet connection. These appointments involving extensive counseling and discussion with families, and are very suitable for telehealth appointments. Families can continue audiology care with their chosen audiologist/clinic as and when they open for services.

WHAT
We will offer unbiased counseling regarding hearing loss, best practices for infant hearing assessment, medical follow-up, and early intervention, communication options, First Steps services available, etc.
