Clinical Observation Hours: Record Form

Student Name: ____________________________________________________  PUID#: ________________________________

*Signature confirms student’s participation in debriefing of observation.

2020 Standards for the Certificate of Clinical Competence in Speech-Language Pathology: V-C: The applicant must complete a minimum of 400 clock hours of supervised clinical experience in the practice of speech-language pathology. 25 hours must be spent in guided clinical observation, and 375 hours must be spent in direct client/patient contact.

*Implementation: Guided clinical observation hours generally precede direct contact with clients/patients. Examples of guided observations may include but are not limited to the following activities: debriefing of a video recording with a clinical educator who holds the CCC-SLP, discussion of therapy or evaluation procedures that had been observed, debriefings of observations that meet course requirements, or written records of the observations. It is important to confirm that there was communication between the clinical educator and observer, rather than passive experiences where the student views sessions and/or videos. It is encouraged that the student observes live and recorded sessions across settings with individuals receiving services with a variety of disorders and completes debriefing activities as described above.
